SUMMARY

A motivated Full Stack Web Developer with nearly 1 year of hands-on experience at a software house, delivering modern, production-ready web applications using React and Next.js. Proven ability to build responsive, scalable front-end solutions while collaborating in real-world team environments. Proficient in React, Next.js, and Tailwind CSS on the front end, paired with NestJS and FastAPI on the back end — all written in TypeScript where it counts. Works confidently with both SQL and MongoDB depending on what a project demands, and has applied n8n to design and implement workflow automations that solve real business problems.

PROFESSIONAL EXPERIENCE

Web Developer | Capregsoft(Private) Limited | July 2025 - June 2026

- Worked on the frontend of **OroTracker**(orotracker.com), a live gold and silver price tracking platform serving investors worldwide, using React, Next.js, Tailwind CSS, and TypeScript.
- Built and integrated key platform features. Delivered a fully responsive, high-performance user interface optimized for both desktop and mobile users across global markets.
- Contributed to the **Capregsoft company's website**(<https://www.capregsoft.com>) by implementing a dynamic particles animation and resolving multiple frontend UI issues, improving overall visual polish and user experience.
- Contributed on the frontend of **SkyLink**, a call center management platform featuring real-time call tracking, agent and campaign management, broadcast tools, AI insights, and analytics dashboards — built with React, Next.js, Tailwind CSS, and TypeScript.

PROJECTS

- E-Commerce Website:** A fully functional React-based e-commerce frontend featuring a product catalog with 50+ items, shopping cart with add/remove functionality, category filtering, user authentication pages, and responsive design across all devices. Built with React 18, Context API, and React Router DOM.
- Warehouse Management System:** A Java OOP-based warehouse management system showcasing object-oriented design, inventory tracking, and data management skills.
- Portfolio Website:** A personal portfolio website showcasing projects and skills, built with JavaScript.
- Jira Automation System:** A full end-to-end automation system built around Jira ticket management. The Next.js and TypeScript dashboard syncs employee data to Supabase, triggering a multi-stage n8n pipeline that captures input from Telegram and Gmail, classifies intent using AI, checks for duplicates, auto-assigns Jira tickets with priority and description, and sends confirmation back to the user — all without manual intervention.
- Final Year Project — AutoGrade(30%):** An AI-powered examination evaluation platform that automates grading of MCQ and descriptive answer sheets using OCR, NLP-based semantic similarity, rubric scoring, and cheating detection. Built with Next.js, NestJS, FastAPI, and PostgreSQL. Currently 30% complete — architecture and system design finalized, with model training and AI pipeline integration still in progress.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Java, C++ | **Frontend:** React.js, Next.js, Tailwind CSS, HTML, CSS | **Backend:** NestJS, FastAPI, RESTful APIs | **Databases:** PostgreSQL, MySQL, MongoDB | **Data & ML:** NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn | **Tools & Platforms:** Git, GitHub, n8n, Supabase, Docker, Postman, VS Code, NetBeans

SOFT SKILLS

Problem-solving | Strong Communication | Teamwork | Adaptability | Creativity | Time management | Attention to detail | Leadership.

EDUCATION

Bachelor of Science in Computer Science | 2023 - Present

(Expected Jan 2027) COMSATS University Islamabad — Wah

Campus | CGPA: 3.60/4.00

Data Analyst Certificate | IBM SkillsBuild Issued by IBM SkillsBuild
